The Starting Point

Here we go!

Let's begin at the beginning!

As you begin to work on a unit study, take time to bring together the whole group that will be working on the study. Ask the following questions of the group, and record their individual answers here. When you complete the unit study, revisit these pages and see just how much has been learned and accomplished.

What is our topic for this study? _____

Why did we pick this topic? _____

What do we already know about this topic? _____

*"It is not because things are difficult that we do not dare.
It is because we do not dare that things are difficult."*

SENECA

Independent Reading

As you venture through this unit study, encourage plenty of independent reading by your students that can read on their own, and read aloud with or along with those not quite reading on their own. Use these pages to keep track of all the books that they read. This list can also be used to keep track library books, too!

"As knowledge increases, wonder deepens."
CHARLES MORGAN

Other Resources We Used

In the process of working on a unit study, you will discover other resources that will help you learn more about your topic. These may include games, professionals, software, museums, science centers, etc. The following pages are for recording information about these resources and how they helped the unit study.

Resource: _____

Details about the resource (software, science center, etc.):

How did this resource help? _____

~~~~~

Resource: \_\_\_\_\_

Details about the resource (software, science center, etc.):
